

# Science & Technology

By Dr. Abhishek Sir

ISSUE TRACKING

work ?

3. Types

4. Major players

5. Benefits

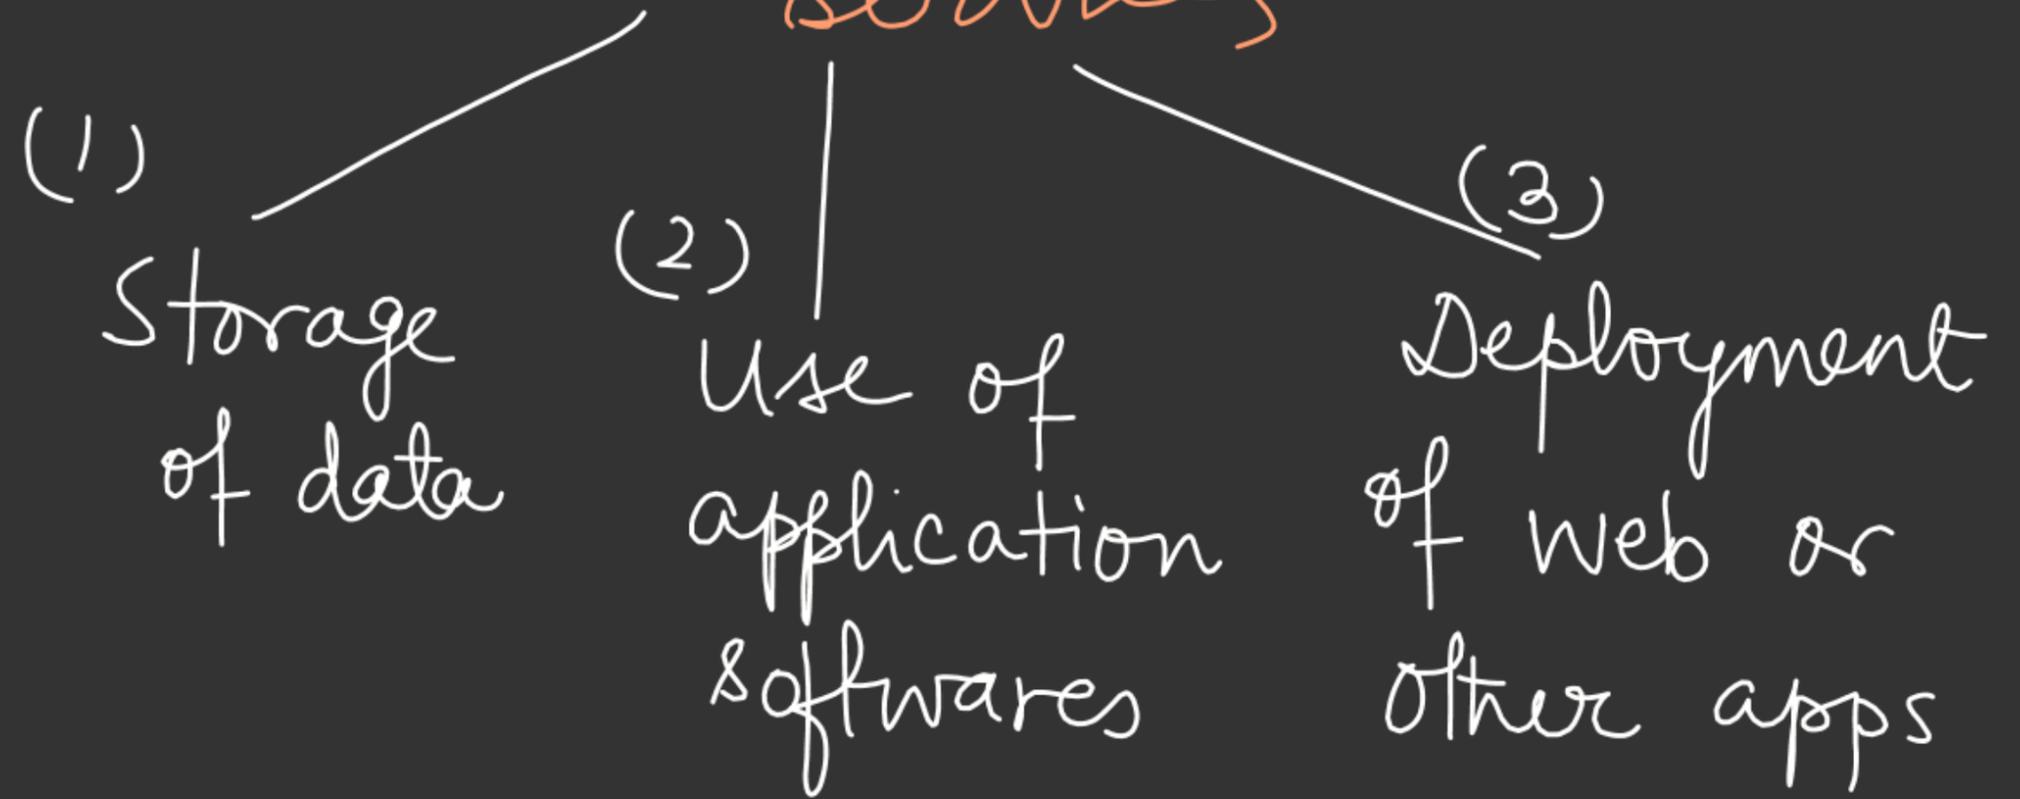

6. Limitations

7. In India

Remote provisioning of

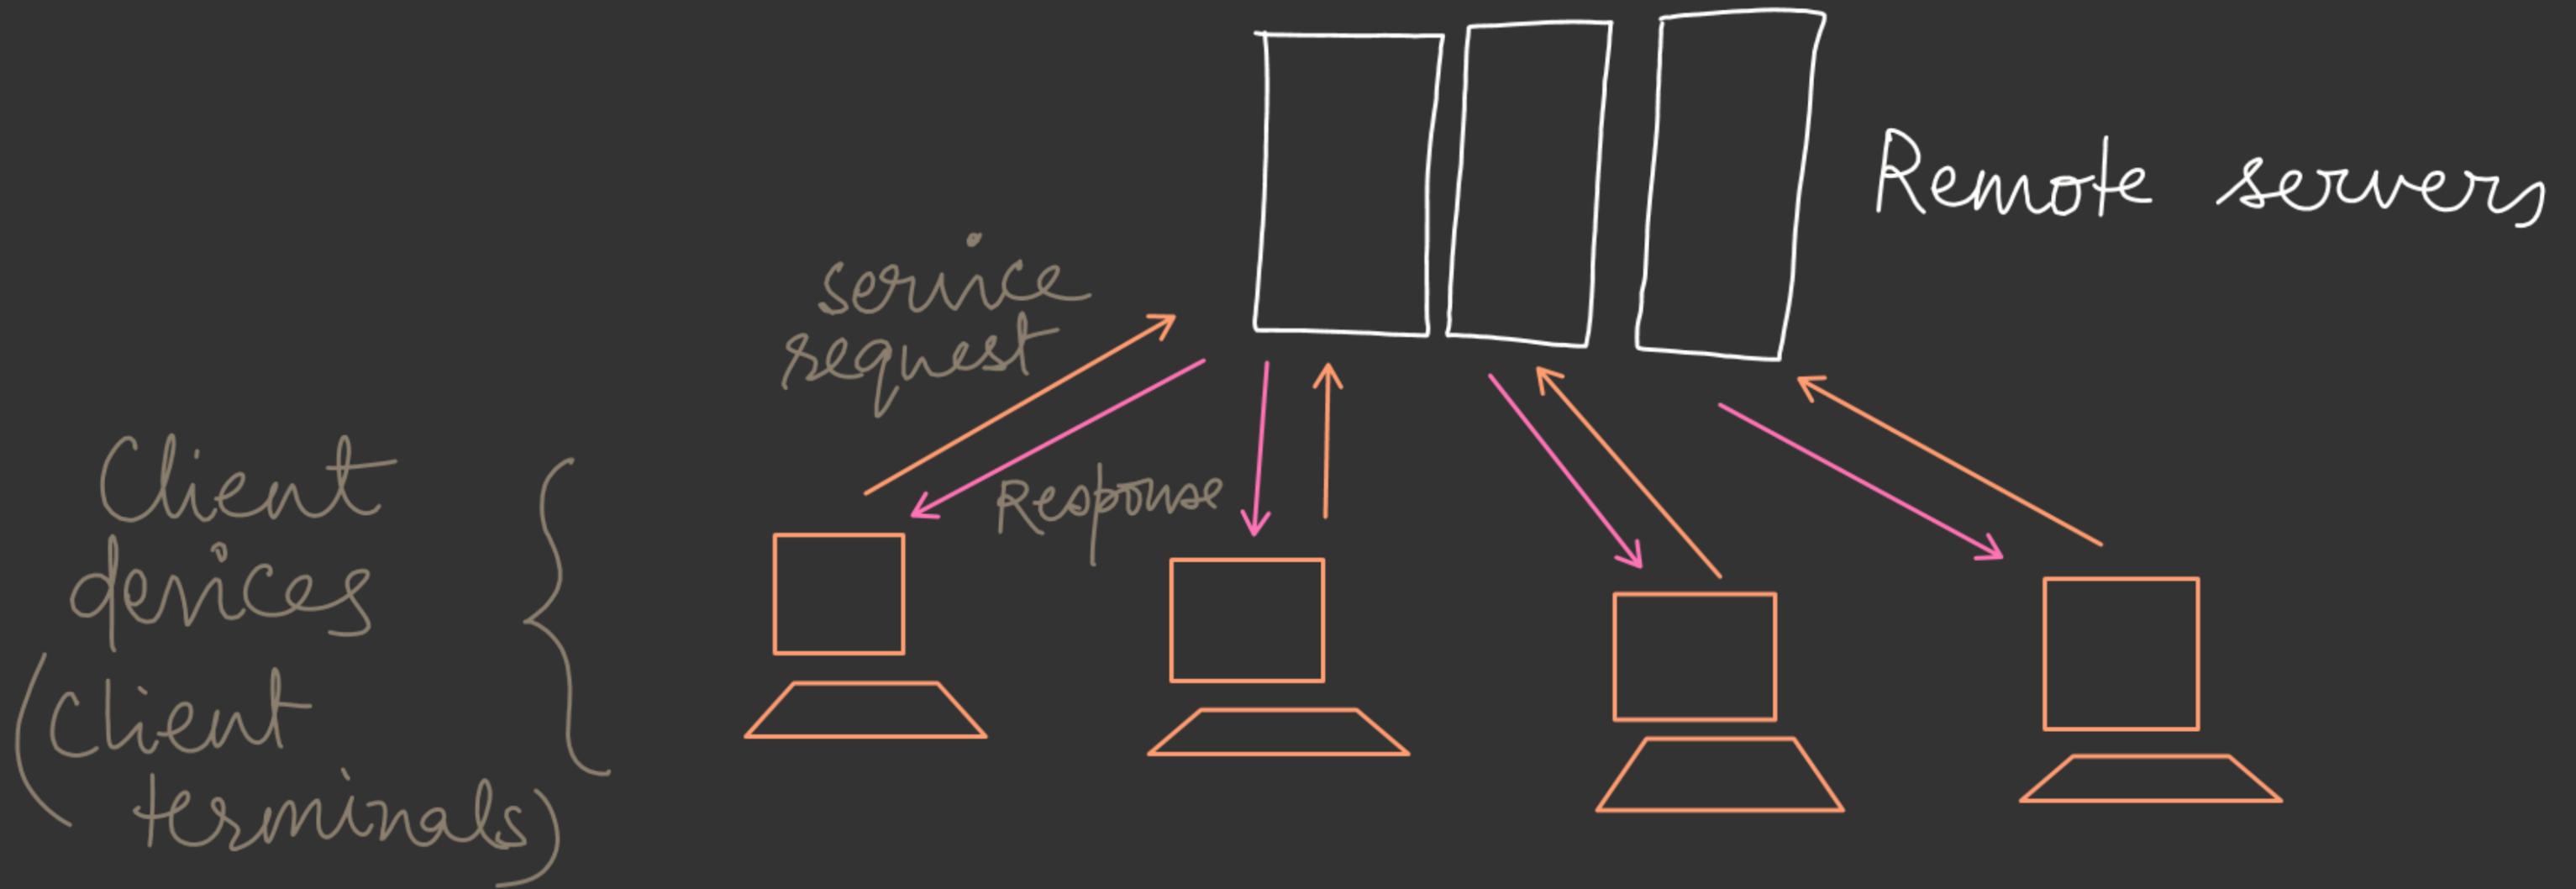

computing services by a  
server to which the client  
machines connects via internet.

# 3 core computing services

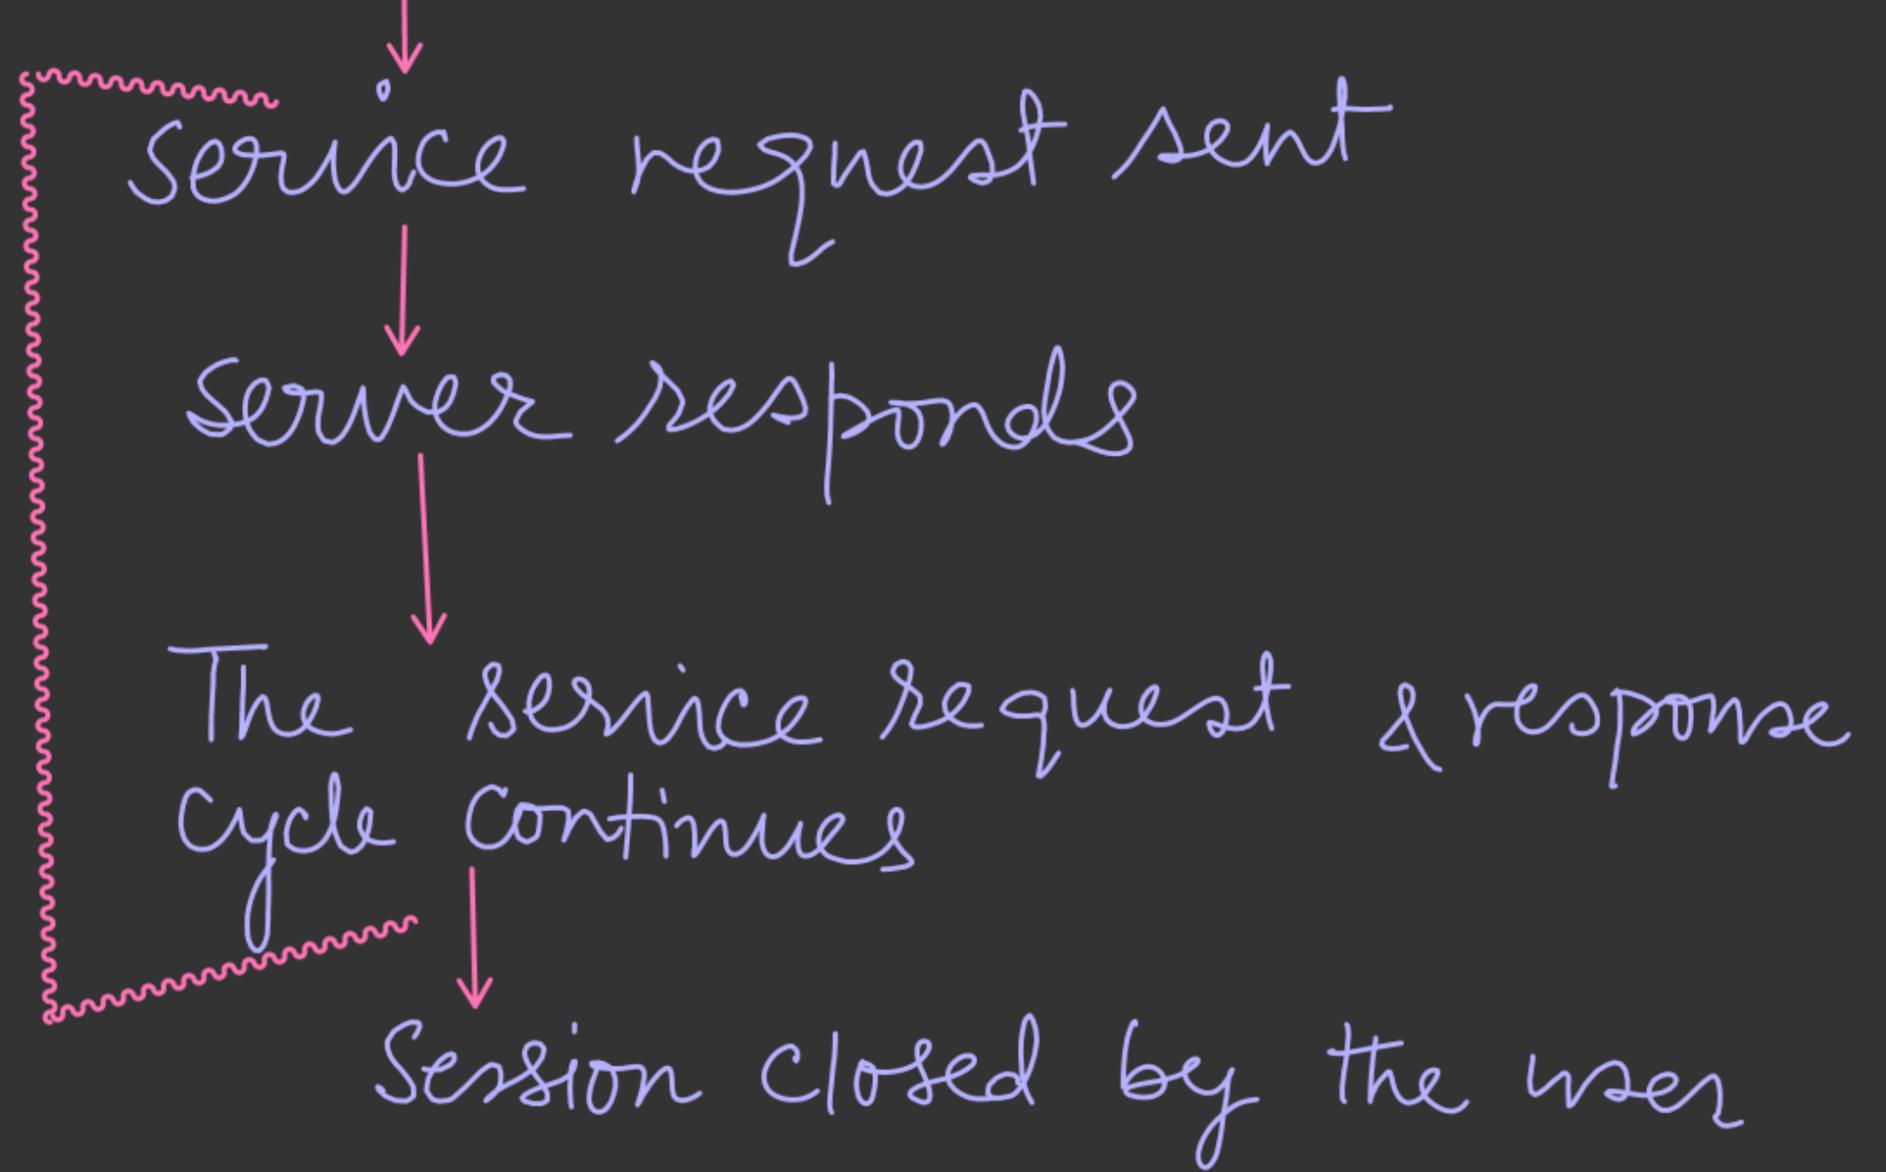

2. How does cloud computing work?

---

Computing  
Services are  
provided

### 3. Types

Based on  
access  
control

Private  
Cloud

→ Restricted  
to pre-defined  
client  
computers

Public  
Cloud

→ anyone can  
create an account  
& avail the service

Based on the  
nature of service

- ↳ 1) Infrastructure  
as a service  
(IaaS)
- 2) Platform " " "  
(PaaS)
- 3) Software as a  
service (SaaS)
- 4) Serverless  
Computing

PaaS → Computing Resource + OS + MW

SaaS → " + " + " + Application  
Software

Serverless Computing → A system to run & validate  
Codes

<u>Company</u>	<u>Controlled by</u>
AWS (Amazon Web Services)	Amazon

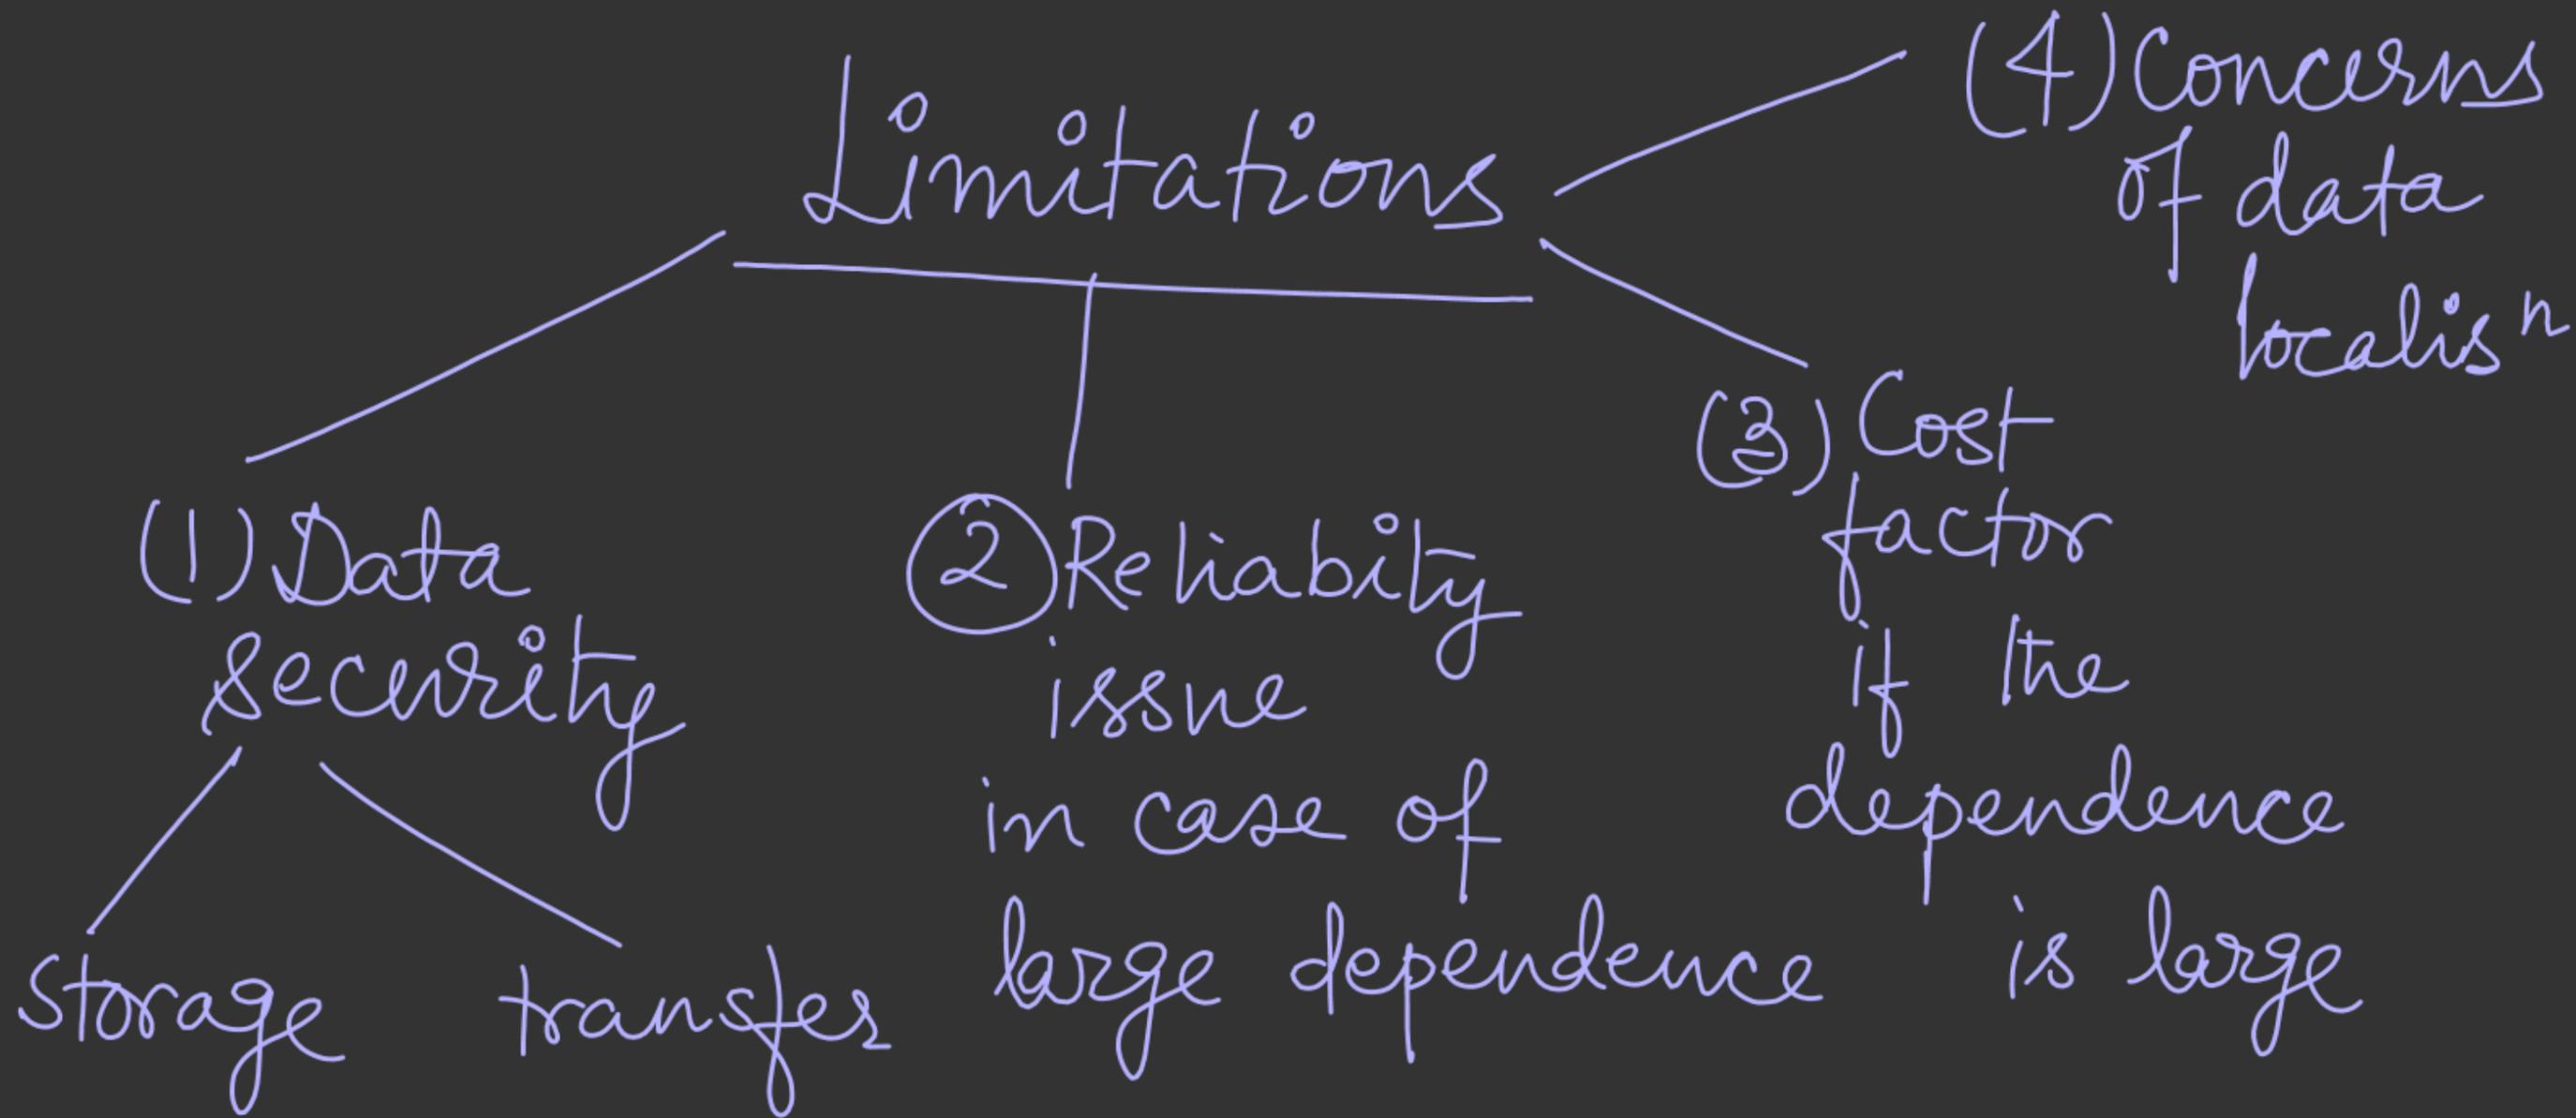

GCP (Google Cloud Platform)	Google
-----------------------------	--------

Azure	Microsoft
-------	-----------

Deep Cloud / IBM Cloud	IBM
------------------------	-----

# Benefits

- ① Accessibility / Availability
- ② Scalability
- ③ Cost factor
- ④ Reliability
- ⑤ Permits collaboration
- ⑥ Low / Zero maintenance

platforms for COVID monitoring & vaccination.

(5) Aayushman Bharat Digital Mission:

Integrated platform for Aayushman Bharat implementation + Safe storage of health records
