KHAN SIR

I climbed into bed and rolled myself in my blankets, first extinguishing the light that burned steadily near the door. I lay still trying to get to sleep but my fear made that impossible and soon I sat up in bed peering into the darkness and occasionally glancing at the round window in the side of the ship which seemed like a plate suspended in the darkness. For an hour I must have sat like this, and then I was suddenly roused, by a draught of cold air. I jumped out of bed; not having allowed for the motion of the ship, I was instantly thrown violently across the room.

Unseen Passage – 2

Nehru's was a many-sided personality. He enjoyed reading and writing books as much as he enjoyed fighting political and social evils or resisting tyranny. In him the scientist and the humanist were held in perfect balance. While he kept looking at social problems from a scientific standpoint, he never forgot that we should nourish the total man. As a scientist, he refused to believe, in a benevolent power interested in men's affairs; but, as a self proclaimed non-believer, he loved affirming his faith in life and the beauty of nature. Children he adored. Unlike Wordsworth, he did not see them trailing clouds of glory from their recent sojourn in heaven. He saw them as blossoms of promise and renewal, the only hope for mankind.

Unseen Passage – 3

“Science cannot reduce the magic of a sunset to arithmetic, nor can it express friendship with a formula” observed the eminent medical researcher, Dr. Lous Orr. He added, “also beyond science’s mastery of nature are love and laughter, pain and loneliness and insights into truth and beauty”. This distancing of science from the human condition perhaps explains why most foreign tourists visiting Britain flock predictably to see the hallowed homes of playwrights, writers and poets, but choose to ignore the habitations where its eminent scientists lived and worked.
